Siberian Roebuck is from Southern Ural down to the Far East region of Ussuri. Except of some few trophies from Mongolia all the SCI Top-10 trophies are from our area in Kurgan!

Hunting areas are vast enough to allow for the use of 4x4 vehicles for spotting, followed by a stalk.

The weather can exert direct influence on hunting success. It is common that some years have very dry spring and summer times. As the result will be less vegetation in the fields and it increase the success of the hunt. Opposite if it was rainy summer can entail higher vegetation and reduce amount of game you will see on the hunt.
